Professional Summary

Full Stack Web Developer with a strong foundation in **software engineering** principles and a passion for building efficient, user-friendly web applications. Proficient in the modern JavaScript Frontend Frameworks (**React**, **Vue.js**) and backend technologies (**Laravel**), in addition to solid knowledge in **Database** design and implementation, with experience in delivering full-stack solutions from concept to deployment. An **active learner** and **problem-solver**, eager to apply my skills in a collaborative team environment to create impactful software products.

Work Experience

Freelance Full-Stack Web Developer (March 2025 – present)

Wafiat | April 2025 – July 2025

Developed and launched a full-stack web application for creating and managing digital obituaries

- Engineered a responsive front-end using **ReactJS**, **InertiaJS** and **TailwindCSS**, ensuring a seamless UI that can handle the multi-step form complex data.
- Built a robust back-end with **Laravel**, implementing data operations, secure authentication system and role-based authorization to control user access, enhancing the application security.
- Designed and implemented **MySQL** database schema and connected it with the application.

Projects

Moiveo

A **React** based movie discovery platform integrated with the **TMDB API**.

- Utilized **React State Management** and **Context API** to efficiently handle global app state.
- Implemented client-side routing with **React Router** for seamless, single-page application architecture.
- Styled the application with **TailwindCSS** to create a fully responsive modern UI.

Little Lemon Restaurant App

A restaurant website built as a capstone project for the **Meta Frontend Developer** program

- Developed a multi-page app with **ReactJS** and **React-Router** featuring table reservation and online ordering system.
- Leveraged **React Context API** for state management to handle shopping cart functionality across components.
- Applied **TailwindCSS** for a consistent visually appealing design.

E-Commerce Website

A full-stack responsive e-commerce platform for fashion and accessories.

- Architected the front-end with **ReactJs** and **TailwindCSS**, creating a dynamic and intuitive shopping interface.
- Developed a custom **RESTful API** using **Laravel** to handle product management, user accounts, and order processing.
- Connected the app to a **MySQL** database for reliable data persistence.

Education

Bachelor of Software Engineering | Homs University | (2022 - present)

Technical Skills

- Programming Languages:** JavaScript, PHP, Python, Java.
- Front-end Technologies:** ReactJS, VueJS, HTML, CSS, TailwindCSS, InertiaJS .
- Back-end Technologies:** Laravel, NodeJS (basic), RESTful APIs,.
- Operating Systems:** Windows, Linux.
- Databases:** SQL, MySQL, Eloquent ORM.
- Tools:** Git, GitHub, Postman.
- Design & Prototyping:** Figma.
- General Knowledge:** Computer Systems, Network Fundamentals, SDLC & Agile Technologies.

Soft Skills

- Teamwork and Collaboration
- Working Well Under Pressure
- Problem Solving & Troubleshooting
- Effective Communication
- Time Management
- Adaptability & Eager to Learn

Languages

Arabice: Native. English: Proficient.

Certificatations & Training

- Meta Front-end developer | Coursera
<https://coursera.org/share/6ededff6784324f1681b607aa2a2588a>
- Tech Boost Homs | 2 weeks intensive training at ICT incubator, Homs
- Laravel 11 Course | Laracasts

Activities

- Hack4Syria 2024 Hackathon
