Summary

I began my programming journey with **Python** , learnt **C++** and **Java** in college, then swiftly transitioned to web development, mastering **HTML**, **CSS**, and **JavaScript**. Enhancing my front-end skills, I mastered **ReactJS**, developing industry-standard projects. I then ventured into back-end development, mastering **PHP** and **Laravel** and worked on various projects completing my full-stack web development expertise...
I recently learned **VueJS** expanding my front-end skill-set and diving deeper in the web development world...

Projects

Wafiat
Complete full-stack web app helping users to create, edit, download and share obituaries (notice of death), built with **Laravel, InertiaJs, ReactJS** and **TailwindCSS** with **MySQL** database, this app includes a multi-step form for creating the obituary and a dashboard for managing users and obituaries. Role based authorization using **LaraTrust** package.

Moiveo
A movies and series app similar to IMDB, developed using **ReactJS** and the **TMDB API**. Users can search for their favorite movies or series, access detailed information and statistics, and watch trailers from **YouTube**. The app uses **React's state management, Context**, and **React Router** to ensure efficient data handling and seamless navigation, and it's styled with **TailwindCSS** to deliver a sleek, responsive user experience.

Little Lemon Restaurant App
The capstone project in the Meta Frontend Developer course, Little Lemon Restaurant App is a comprehensive restaurant website with 5 main pages. It enables users to view information about the restaurant and its menu, reserve tables, order meals online, and sign in if they choose. Built with **ReactJS**, it leverages a component-based architecture and utilizes **React's state management, Context** and **React Router** ensuring smooth navigation and seamless data flow across components. The app is styled with **TailwindCSS** to create a modern, responsive user interface.

E-Commerce Website
A responsive web application dedicated to online fashion and accessory sales. Developed using **ReactJS** and styled with **TailwindCSS** for a sleek and modern user interface. The backend is powered by a **Laravel API** and **MySQL**, ensuring robust and efficient data management.

Technical Skills

- **Programming:** JavaScript, PHP, Python, Java.
- **Front-end Technologies:** ReactJS, VueJS, TailwindCSS, HTML, CSS.
- **Back-end Technologies:** Laravel, InertiaJS, RESTful APIs, basic NodeJS.
- **Operating Systems:** Windows, Linux.
- **Databases:** SQL, MySQL.
- **Tools:** Git, GitHub.
- **Design Tools:** Figma.
- **General Knowledge:** Solid knowledge in computer systems and network fundamentals.

Soft Skills

- **Teamwork and Collaboration**
- **Problem Solving**
- **Effective Communication**
- **Time Management**
- **Adaptability & Eager to Learn**

Languages

Arabice: Native.   **English: Proficient.**

Education

Bachelor of Software Engineering at Homs University   **(2022 - present)**

Courses

- **Meta Front-end developer:**
  https://coursera.org/share/6ededff6784324f1681b607aa2a2588a

- **Laracasts Laravel 11**

Activities

- **Hack4Syria 2024 Hackathon**
- **Tech Boost Homs 2 weeks training at ICT incubator, Homs**
