Portfolio: https://mahmoud-al-awaj.netlify.app | **Phone:** +963 940 519 484

Education

Bachelor of Software Engineering - final year| Homs University | (2022 - present)

Technical Skills

- **Programming Languages:** JavaScript, PHP, Python, Java, C++.
- **Front-end Technologies:** ReactJS, VueJS, InertiaJS, TailwindCSS.
- **Back-end Technologies:** Laravel, NodeJS, NestJS, RESTful APIs, MVC.
- **Operating Systems:** Windows, Linux.
- **Databases:** SQL, MySQL, Eloquent ORM.
- **Tools:** Git, GitHub, Postman.
- **Design & Prototyping:** Figma.
- **General Knowledge:** Computer Systems, Networks Fundamentals, Security, SDLC & Agile Technologies.

Professional Experience

Freelance Full-Stack Web Developer (March 2025 – present)

e-Services | November 2025 – February 2026

Worked as a frontend developer with a team of 3 on an ecommerce online services web app

- Built a responsive UI using **Vue** and **TailwindCSS**, implementing dashboard for adding services and managing orders.
- Used **Pinia Stores** to handle different state and professionally handle separate states.
- Collaborated with the backend and implemented a robust **Token Authentication** with **refresh token** using **Axios Interceptors** ensuring maximum security and protection.

Wafiat | April 2025 – July 2025

Developed and launched a full-stack web application for creating and managing digital obituaries

- Engineered a responsive front-end using **ReactJS**, **InertaiJS** and **TailwindCSS**, ensuring a seamless UI that can handle the multi-step form complex data.
- Built a robust back-end with **Laravel**, implementing data operations, secure authentication system and role-based authorization to control user access, enhancing the application security.
- Designed and implemented **MySQL** database schema and connected it with the application.

Projects

Moiveo

*A **React** based movie discovery platform integrated with the **TMDB API**.*

- Utilized **React State Management** and **Context API** to efficiently handle global app state.
- Implemented client-side routing with **React Router** for seamless, single-page application architecture.
- Styled the application with **TailwindCSS** to create a fully responsive modern UI.

Little Lemon Restaurant App

*A restaurant website built as a capstone project for the **Meta Frontend Developer** program*

- Developed a multi-page app with **ReactJS** and **React-Router** featuring table reservation and online ordering system.
- Leaveraged **React Context API** for state management to handle shopping cart functionality across components.
- Applied **TailwindCSS** for a consistent visually appealing design.

E-Commerce Website

A full-stack responsive e-commerce platform for fasion and accessories.

- Architected the front-end with **ReactJs** and **TailwindCSS**, creating a dynamic and intuitive shopping interface.
- Developed a custom **RESTful API** using **Laravel** to handle product management, user accounts, and order processing.
- Connected the app to a **MySQL** database.

Volunteering

IT Student Committee - Training Office (January 2026 – present)

Worked on different training courses with the IT-Committee training office team, reducing the gap between the job market and skills students get from college

- Searching for **outstanding trainers** to collaborate with in different **IT fields**.
- Suggesting **course topics** and **important skills** to make courses about
- Organizing events and training sessions
- Helping in technical challenges in students registration and contact, like **GoogleSheet AppScript** scripts for sending emails and **GoogleForms**

Soft Skills

- **Teamwork and Collaboration**
- **Working Well Under Pressure**
- **Problem Solving & Troubleshooting**
- **Effective Communication**
- **Time Management**
- **Adaptability & Eager to Learn**

Languages

- **Arabice: Native.**
- **English: Proficient.**

Certificatations & Training

- **Tech Boost Homs | 2 weeks intensive training at ICT incubator, Homs**
- **Meta Front-end Developer | Coursera**
- **12 Hours React Course | FreeCodeCamp**
- **Laravel 11 Course | Laracasts**
- **Laravel Daily Roadmap (mid level) | Laravel Daily**

Activities

- **picoCTF 2026 cybersecurity CTF contest.**
- **Hack4Syria 2024 Hackathon.**
